VIEW ALL

Precision Compliance

Our model separates AI-assisted ranking from regulatory safety gates, ensuring every choice is both green and safe.

EXPLORE THE SCIENCE

Defining Food Properties

Precise scientific inputs are the foundation of accurate packaging recommendations.

CHEMICAL ENVIRONMENT

Water Activity (a_w) **0.82**

DRY (0.2) MOIST (1.0)

Acidity (pH Level) **4.5**

ACIDIC NEUTRAL ALKALINE

SENSITIVITY ANALYSIS

Oxygen (Oxidation)
Lipid oxidation or Vitamin C degradation risk.

UV & Visible Light
Photosensitive pigment or vitamin loss.

Ethylene Gas
Accelerated ripening in climacteric produce.

VISUAL MATERIAL REFERENCE

TOP SCIENTIFIC MATCH

98.2 COMPATIBILITY SCORE

Bio-PLA Fiber Coated Mesh

SHELF LIFE
180 Days

IMPACT
A++

"Optimized for climacteric respiration and ethylene control."

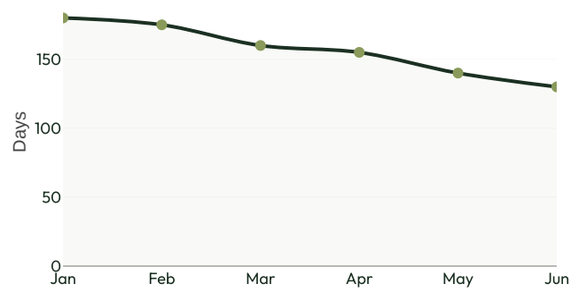

DETAILS

"What-If" Analysis

INTERACTIVE SIMULATION TOOL

Storage Temperature 22°C

Oxygen Barrier (OTR) 15.5

ALTERNATIVE OPTIONS

02 **Recycled Kraft Laminate** Score: 84.5
120d High Eco VIEW

03 **Compostable Barrier Film** Score: 79.2
95d Bio-Based VIEW

Proceed to Compliance

Regulatory Verified

SAFETY GATE STATUS: PASSED

VERIFICATION CHECKLIST

Global Migration Testing
Conforms to EU 10/2011 and FDA standards for food contact materials.

Ref: ISO 9001 | Doc #2921-A

Specific Migration Limits (SML)
Safety assessment for heavy metals, BPA, and phthalates complete.

Local Regulatory Variance
Pending review for Southeast Asian regional specific additives.

ASK REGULATORY Q&A

PACKAGING PASSPORT

Digital Certificate
UUID: GN-8821-X-2026

SUSTAINABILITY RANK	Excellent (A++)
CARBON IMPACT	0.42 kg CO_2e / kg
MATERIAL BASE	Lignin-Based Polymer
DISPOSAL ROUTE	Home Compostable

"This digital passport provides end-to-end transparency for supply chain partners and consumers."

DOSSIER

Next: Circular Economy

A Life Beyond Use

SUSTAINABILITY STRATEGY

RECOMMENDED PATHWAYS

SECONDARY LIFE
Priority: High

Repurpose agricultural side-streams for non-food grade industrial fiber production or sustainable construction binders.

EXPLORE PARTNERS

NUTRIENT CYCLE
Priority: Medium

Convert bio-residuals into nutrient-rich soil amendments through managed industrial composting systems.

STANDARD PROTOCOL

CONSUMER DISPOSAL GUIDE

- REMOVE ADHESIVES
- RINSE & DRY PACK
- CHECK LOCAL SORTING
- HOME COMPOST

Finalize Strategy
